

LAMP Accounts Payable

The Light at the End of the Tunnel

Accounts Payable provides invoice and payment processing activities of your company. It is integrated with purchasing and accommodates all trade and non-trade transactions.

Accounts Payable Features

Effective Cash Management

Accounts Payable allows you to accomplish your payment obligations meet to your suppliers while enjoying the discounts and prepayment support that guarantees effective cash management.

Automated Invoice Processing

This module computes taxes, discounts, and currency conversions based on your specifications allowing you to benefit from your supplier's terms without disrupting the process.

Flexible Invoice Payment

Accounts payable displays the schedule of payment based on the created invoice. Here, you can also pay in partial or in full depending on your agreement with the supplier.

Integration with Purchasing Module

Accounts Payable is directly linked to Purchasing module allowing you to match the ordered items accurately.

Integration with Inventory Module

Accounts Payable is linked to Inventory module allowing you to match only the items re-

ceived by the Inventory department.

Benefits of Accounts Payable

- Facilitates invoicing and matching
- Keeps track of payments
- Integrated with the Purchasing, cash management, and Inventory modules

Benefits of Using LAMP

Ease of Use

LAMP Enterprise, as a web-enabled application is easy to use. Its embedded workflows make learning curve shorter.

Availability

LAMP Enterprise is engineered to be a web-enabled business software with PDA support in order for it to work on any platform with a web browser, or internet enable phones like Blackberry, iPhone and SmartPhone. The availability of internet through phones, 3G and wifi make LAMP Enterprise available anytime, anywhere in the world.

Support

Not only do you get software, you get a team of professionals to handle your questions, maintain the system, and perform your backups. It's like having your own IT department without all the costs associated with it.

Flexibility

LAMP can be configured precisely to match the needs of each customer eliminating the need for large information technology investments. Choosing from a full menu of LAMP-managed business functions, customers can integrate all of the avail-

able applications or simply implement their desired functions a la carte.
