

EDUCATION ADMINISTRATION SYSTEM

The greatest challenge for colleges and universities is the ability to provide the best possible service to their students, faculty members and personnel.

With Education Administration System (EAS), you have a comprehensive suite of applications that facilitates the school's admissions, curriculum, registration, and enrollment processes.

**Features of EAS****Admission**

EAS facilitates the entire admissions process from student application to student acceptance and course assignment. Screening of eligible student is made easier and credited subjects are processed.

Pre-enrollment Transactions Processing

In preparation for enrollment, the student's subject needs are generated and the necessary student payments required are prepared to facilitate a smoother enrollment process.

Enrollment Procedure

During enrollment, it is essential to properly manage the schedule of faculty members, rooms and available courses. EAS assists you in fully utilizing the school's facilities and instructors with students and ensures an organized school opening.

Semester Processing

EAS manages the processing of students grades and evaluation of the faculty members. It also ranks the faculty evaluation.

Registrar

The Registrar module offers comprehensive capabilities in handling student registrations which include maintenance of academic records, production of transcripts, and tracking of curriculum information.

Student Affairs and Cultural Services

This serves as the handbook of the students on general and academic information. It also defines the different types of offenses and penalties for student misconduct.

Scholarships

EAS recognizes the scholarship given by the school and by third party organizations. It also maintains all functions required to process the scholarship.

Accounting

EAS handles all accounting related processes of the university. It accepts payment from the students and makes adjustments to the fees and other student charges if necessary.

Our Commitment

We build lasting relationships with our clients by helping them create new business models and innovative solutions thereby enabling organizations to leverage technology for a stronger return on investment and provide enhanced services to their customers, vendors and employees.
