

IMPLEMENTATION SERVICE

Our Company

Impart Solutions specializes on consulting services for enterprise resource planning (ERP) packages such as Oracle, SAP or LAMP. We are dedicated in providing clients with the best functional and technical consultants to ensure the success of every ERP implementation.

We are focused exclusively on delivering business intelligence and analytic solutions that help companies measure, manage and improve their performance.

Our philosophy is to align ourselves closely with our customers, and to build a detailed understanding of their business needs and issues. As a result, our consultants possess a very strong knowledge base in any ERP applications such as financials, manufacturing, logistics and distribution arenas. We have developed a detailed understanding of our customers' information analysis requirements, key performance measures, and best practices.

Impart Solutions has a proven set of methodologies that delivers complex, integrated systems and architecture projects. We use an integrated collection of tools and processes that covers solution design, organizational change and program management.

Our track record shows that our clients from both mid-market and large companies are satisfied with the services we provide. We have earned the reputation of having delivered the fastest Oracle process manufacturing implementation.

Impart Solutions is focused on consistently delivering superior business value through client specific solutions and building long-term relationships, to enable customers capture market opportunities.

Results Driven Methodology

Impart Solutions adheres to the use of tried and tested methodologies. A combination of proven selection and implementation of integrated packaged software methodology and Solution Pathway Framework would be appropriate in ensuring project's successful implementation.

These are the key phases to our successful implementation

Business Process Review

Every implementation success has to understand the optimum business process and solution. Results are of great value and are worthwhile investing in the right level of fact-finding, analysis and review.

Prototype Creation

After the packaged-based applications has been installed and ready for use. This makes an excellent design aid. Working prototype is developed to demonstrate the critical business process workflows.

Technical Program Management

This phase covers the management and coordination of the team and the client's resources in creating, maintaining and supporting the technical infrastructure required for successful implementation.

Change Management and Training

Impart Solutions has specialists in the education and training of staff, particularly in terms of new computer applications and the introduction of new business processes.

Helpdesk Support

To closely monitor all the issues that may arise during the support phase. In this phase, the problems are logged and helpdesk dispatches every issue raised to the right person.

Post Partum Review

This phase will give the project team, both Impart Solutions consultants and the client, a chance to evaluate the project objectively from all points of view.

Report Writing

We have a pool of experienced report writers that can create and customize reports based on the client's requirements.

We Are Committed to YOU

Impart Solutions has what it takes to provide effective and efficient service delivery. We are passionate about working with our clients to deliver exceptional value. We build lasting relationships with our clients by helping them create new business models and innovative solutions thereby enabling organizations to leverage technology for a stronger return on investment and provide enhanced services to their customers, vendors and employees.
