

LAMP ENTERPRISE

In today's busy world, it is important that you have access to your business information wherever you are and whenever you need it. Impart Solutions, Inc. developed LAMP, a state of the art solution that provides you with the best, easy to learn and easy to access ERP system.

LAMP covers all the requirements of a modern company engaged in services, manufacturing, or sales. It can be deployed quickly and companies can be productive with it immediately. Compared to traditional ERP, LAMP offers a significant reduction in your Total Cost of Ownership (TCO).

Benefits of Using LAMP

Available anytime anywhere

LAMP is true on-demand software. You can access it anytime you want and anywhere you are. You just need an internet connection and you can see the information you need in a snap.

Easy to learn and use

Learning LAMP is as easy as learning ABC. If you know how to use Internet Explorer or Mozilla Firefox, you are assured that you can use LAMP in minutes.

Low Cost of Ownership

As opposed to archaic models where you invest a large amount on personnel hardware, infrastructure, and maintenance for your enterprise applications, On-Demand software is hosted and maintained in a secure datacenter.

Support is always available

Not only do you get software, you get a team of professionals to handle your questions, maintain the system, and perform your backups. It's like having your own IT department without all the costs associated with it.

LAMP Modules

LAMP is an extensive set of business applications that enables you to improve your productivity and help you in managing your business and customers.

Human Resources

Human Resources facilitate management of the most valuable resource of any organization - its workforce. Here, you can manage all your employee information and provide collaborative workflows that facilitate approval processes and transactions.

Planning

Planning provides the core functions for demand-based manufacturing and distribution. This highly integrated module advances revenue growth and cost reduction by facilitating order fulfillment, reducing inventory, shrinking lead times, and achieving procedural improvements.

Production

Production provides a quick response to an organization's discrete or process manufacturing needs. It maintains and calculates information on all allocated components, operations and instructions.

Accounts Payable

Accounts Payable provides invoice and payment processing activities of your company. It is integrated with purchasing and accommodates all payment transactions.

Quality

Quality provides a comprehensive set of test specifications and sampling that can be performed on all items ensuring the quality of an organizations materials, manufacturing process, and finished goods.

Services

Services delivers a complete service solution to customers with the goal of providing responsive service that will result in building successful business relationships with your clients.

Inventory

Inventory enables your organization to track and control finished goods and raw materials in real time. The comprehensive functionality helps maintain adequate levels of inventory with the proper set of controls.

Sales and Advance Distribution

Sales and Advance Distribution reduce order fulfillment costs and cycle time through improving order accuracy and facilitating on-time delivery. LAMP enables real-time tracking of order status ensuring that deliveries arrive on time, all the time.

Purchasing

Purchasing strengthens your organization's supply chain management through monitoring of supplier relationships, collaboration with preferred vendors, and tracking of purchase order status deliveries of goods and services.

Fixed Asset

Leverage the value of your Fixed Assets Inventory, minimize the cost of tracking physical assets and maintain information on assets from initial acquisition through retirement, revaluation and disposal. LAMP Fixed Assets offers a fresh approach by delivering financial control and system flexibility to enable you to account and manage your assets in an utmost efficient manner.

Accounts Receivable

Accounts Receivable handles receipts and provides your company with real-time accounts receivable information. It improves your customer relationships, and enhances your organization's ability to respond to credit and collections issues. This facilitates the receivables process of sales order shipments through its tight integration with Sales module.

General Ledger

LAMP'S GL facilitates the organization's financial management and streamlines your financial operations and improves the accuracy of your financial reporting. GL is integrated with other LAMP modules offering a one-stop shop for all your accounting entries.

Cash Management

The LAMP Cash Management module offers an easy to use tool to optimize the liquidity by implementing effective cash management systems and process, providing the requisite tool to accurately forecast cash, giving you a simple way to stay on top of your cash flow and ensure that accounts are funded at optimum levels.

Our Commitment

We build lasting relationships with our clients by helping them create new business models and innovative solutions thereby enabling organizations to leverage technology for a stronger return on investment and provide enhanced services to their customers, vendors and employees.
