

LAMP for Bottlers

The Light at the End of the Tunnel

One of the unique yet challenging requirements of Bottlers is the ability to plan and release production batches based on the availability of glass containers or returnable materials.

LAMP Enterprise provides Bottlers control and visibility of returnable materials in the supply chain - from multiple warehouses, in-transit locations and sales offices to independent distribution partners and customers thru its Demand Order and Return Order features in Planning.

LAMP Enterprise ERP's "componentization" functionality which breaks down the configuration of a full goods case into contents, returnable bottles and returnable case addresses the problem of Bottlers when managing accurate inventory counts during transactions and physical inventory activities.

The Sales and Financials integration ensure revenue and all other transactions are booked into the finance subsystems and the general ledger.

About LAMP Enterprise

LAMP Enterprise is developed by **Impart Solutions, Inc.** for companies in need of an affordable ERP solution. It is rich with premier enterprise level features, costs a fraction of the price and can be implemented in less time than a traditional ERP solution. It covers a wide range of industries catering to their requirements using best practices.

- Sales & Advanced Distribution
- Web Ordering

HR and Time and Expenses

- Human Resources
- Payroll
- Time & Expense

Logistics and Operations

- Purchasing
- Inventory
- Planning & Formula
- Production , Costing & Quality

Availability

LAMP Enterprise is engineered to be a web-enabled application with PDA support in order for it to work on any platform using a web browser or internet-enabled mobile phones like Blackberry, iPhone, and SmartPhone. With the wide availability of internet through DSL, WiFi, and 3G wireless networks, LAMP applications become always available.

Ease of Use

End-users have become accustomed to web-browsing with the proliferation of the internet applications and the web. As a result, LAMP, as a web-enabled application, becomes easy to use by the community.

Cost Efficient

LAMP follows the Software as a Service (SaaS) model that drives down costs normally assumed by the consumer. With LAMP, your enterprise application is hosted and maintained in a secure datacenter eliminating the need to invest a large amount on per-

sonnel, hardware, infrastructure, and maintenance for your applications.

LAMP offers a significant reduction in your Total Cost of Ownership (TCO) compared to other ERP systems.

Support

Not only do you get software, you get a team of professionals to handle your questions, maintain the system, and perform your backups. It's like having your own IT department without all the costs associated with it.

Flexibility

LAMP can be configured precisely to match the needs of each customer eliminating the need for large information technology investments. Choosing from a full menu of LAMP-managed business functions, customers can integrate all of the available applications or simply implement their desired functions a la carte.

Our Commitment

Impart Solutions is fully committed to the success of every customer initiative. Impart honors this commitment by creating products and providing services that bring sophisticated enterprise management essentials to companies at all market levels.
