

# LAMP for Small Business

*The Light at the End of the Tunnel*

In today's information-driven society, it is vital that you have access to your business data whenever and wherever you are.

Impart Solutions, Inc. developed LAMP Enterprise ERP (LAMP), a Software as a Service (SaaS) driven Enterprise Resource Planning (ERP) solution that provides you with the competitive advantage needed to make your cut above the rest starting at a cost lower than what you pay for a programmer's monthly salary.

LAMP is developed for companies in need of an affordable ERP solution. It is rich with premier enterprise level features, costs a fraction of the price and can be implemented in less time than a traditional ERP solution.

## LAMP Small Business Packages

LAMP Enterprise Small Business packages are designed for SME's and companies who want to use LAMP quickly. More users and/or module applications can be deployed later as the need arise.

### A. Starter Pack

- 2 - 5 users monthly subscription
- 4 days standard Configuration/ Implementation with Training
- Foundation modules: General Ledger, Inventory, Accounts Payable and Purchasing
- Fixed-price, standard best-practice Implementation
- Additional modules configuration/ implementation available upon request

### B. Basic Small Business Pack

- 5-10 users monthly subscription
- 6 days standard Configuration/ Implementation with Training
- Foundation modules: General Ledger, Inventory, Accounts Payable and Purchasing

- Fixed-price, standard best-practice Implementation
- Additional modules configuration/ implementation available upon request

## LAMP Enterprise Cost Savings Benefits

LAMP follows the Software as a Service (SaaS) model that drives down costs of owning business software. With LAMP, your application is hosted and maintained in a secure datacenter eliminating the need to invest a large amount on personnel, hardware, infrastructure, and maintenance for your applications.

### Availability

LAMP Enterprise is engineered to be a web-enabled business software with PDA support in order for it to work on any platform with a web browser, or internet enable phones like Blackberry, iPhone and SmartPhone. The availability of internet through phones, 3G and wifi make LAMP Enterprise available anytime, anywhere in the world.

### Ease of Use

LAMP Enterprise, as a web-enabled application is easy to use. Its embedded workflows make learning curve shorter.

### Support

Not only do you get software, you get a team of professionals to handle your questions, maintain the system, and perform your backups. It's like having your own IT department without all the costs associated with it.

### Flexibility

LAMP can be configured precisely to

match the needs of each customer eliminating the need for large information technology investments. Choosing from a full menu of LAMP-managed business functions, customers can integrate all of the available applications or simply implement their desired functions a la carte.
