

MANAGEMENT CONSULTING SERVICE

Impart Solutions, Inc provides an integrated range of Management Consulting services to meet the challenges of implementing difficult organizational change. Our experts are equipped with the right skills to handle the complexity of change and improvement, such as business processes, systems and structures.

Our consultants explore the terrain between where you are, and where you want to go. When encountering obstacles, we help you find the best way over, around or through the obstacles. We help you discover the significance of an obstacle, and the possible strategic and tactical alternatives. We offer knowledge that would make your march forward easier and less risk prone, while you remain firmly in charge.

Our only goal is customer satisfaction.

Our Approach

Our consultants are involved in the selection work. Although we may assist you in any aspect of the work, it is important that our clients' organizational values and opinions are applied. The ultimate choice must always be made by the client management. Our project management team works to make sure that a balanced and fair view of the various options is presented and understood by the client management where we assist them in making key decisions given our impartial recommendations.

Our Practices

Services we offer:

- Project Management
- Software Product Selection
- IT Strategy
- Organizational Business Facilitation

IT Strategy

Our proven IT strategies:

- IT Assessment
- Strategic Systems Planning
- Baseline for development and operations departments - comparing performance against benchmark averages and identifying areas for improvement
- Technology and infrastructure

Project Management

Impart Solutions frequently provides project management services for package-focused projects. Great advantages can be obtained from a "package-focused" approach. However, it tends to result in more complex project management issues that require understanding of the "user focus" approach. Our consultants are ideally suited for this work. Our first-rate project managers follow proven methodology in planning each engagement.

Impart Solutions uses the Selection and Implementation of Integrated Packaged Software (SIIPS) methodology for integrated package implementation. This methodology addresses all aspects of work involved in the definition, evaluation and implementation of business solutions. It deals with the full lifecycle of an application.

- Project Launch
- Selection
- Delivery
- Post Implementation Review
- Post Implementation Assistance
- Business Benefit Assessment

Our Commitment to YOU

Impart Solutions has what it takes to provide effective and efficient service delivery. We are passionate about working with our clients to deliver exceptional value. We build lasting relationships with our clients by helping them create new business models and innovative solutions thereby enabling organizations to leverage technology for a stronger return on investment and provide enhanced services to their customers, vendors and employees.
