

PAYROLL

LAMP's Payroll module provides an easy and cost effective way of facilitating the compensation of all the members of your workforce. This module responds to different forms of employee remuneration. With features such as standard salaries and deductions, allowances, inquiry and reports, your organization will get a wide array of functionality for the benefits processing.

Payroll Features

Timekeeping Facility

The Payroll module provides a timekeeping facility that supplies the necessary information for the computation of each employee's salary per specified period.

Accurate Computation of Earnings and Deductions

The Payroll module is equipped with the standard payroll formula that computes each employee's earnings and deductions accurately.

Payroll Info Inquiry

Payroll information can be viewed using the Inquiry section of the Payroll module. Parameters can be specified to provide you with the data you need.

Integrated with Human Resources Module

The Payroll module is linked with Human Resources module. This module provides the necessary information to complete the payroll process. Basic rates and available leave credits of each employee are monitored here.

Integrated with Accounts Payable Module

The Payroll module is linked with Accounts Payable module. This module is responsible in releasing the payroll to each employee.

Report Availability

Payroll standard reports are available for easy payroll data analysis.

Benefits of Using Payroll

- Easy to use timekeeping facility
- Ensures accurate computation of employees' compensation
- Provides facility to monitor payroll information
- Provides standard payroll reports
