

## PRODUCTION

Production comprises all activities related to the conversion of components to products. It provides a quick response to an organization's discrete or process manufacturing needs. It maintains and calculates information on all allocated components, operations and instructions.

### Production Features

The production cycle starts from processing the components, quality assurance, and packaging up to its issuance for storage or delivery to warehouses.

#### Integrated Production Planning

The creation of Firm Planned Order (FPO) starts the production cycle to plan the production of the product. This enables you to recognize the need for components and plan appropriately. FPOs

#### Industry Standard Batch Production Process

LAMP production offers the creation of production batches which can be converted from FPOs and it undergoes the following processes to achieve efficiency and accuracy of materials used and product produced:

#### Production Financial Integration

Each process and activity in the batch process automatically creates financial transactions that allow you to account for materials and products used including variances incurred. LAMP provides facilities to perform product cost rollups to account for accurate costing of finished goods.

#### Detailed Monitoring of Production Activities

LAMP Production offers detailed inquiries providing you with essential production batch and FPO information to enable you to make decisions to improve production efficiency.

#### Industry Standard Production Reports

Production provides industry standard reports that can be used by enterprise clients on a daily basis.

### Benefits of Using Production

- Monitors production schedule
- Automatic computation of usage variance and yield variance
- Automatic generation of accounting entries
- Automatic scaling
- Availability of standard reports
- Automatic recording of product cost
- Integration with Planning and Inventory modules
- Easy inventory tracking

### Benefits of Working with Impart Solutions

We build lasting relationships with our clients by helping them create new business models and innovative solutions thereby enabling organizations to leverage technology for a stronger return on investment and provide enhanced services to their customers, vendors and employees.
