

## PURCHASING

The Purchasing module strengthens your organization's supply chain management through monitoring of supplier relationships, collaboration with preferred vendors, and tracking of purchase order status deliveries of goods and services.

### Purchasing Features

#### Inventory and Planning Integration

Purchases are automatically created depending on stock replenishment rules allowing you to effectively plan for material deliveries.

#### Automates the Approval of Documents

Through the use of LAMP's approval hierarchy, purchasing documents are automatically forwarded and controlled based on approval limits and accounts specified. Notifications and email are automatically sent to corresponding employees defined.

#### Purchase Order Flexibility

LAMP purchasing provides you with the ability to create detailed purchase orders specifying various options to cater to your individual needs to facilitate supplier delivery, inventory receipt, and AP invoicing.

#### Accurate Monitoring of Purchasing Documents

LAMP purchasing offers in-depth tracking and monitoring of the status of purchasing documents from the creation of purchase requisition up to purchase order receipt and billing.

#### Industry Standard Reports

Purchasing provides industry standard reports that can be used by enterprise clients on a daily basis.

### Benefits of Using Purchasing
