

QUALITY

Quality lowers production cost and improves customer satisfaction quality by providing a comprehensive set of tools for test specifications and sampling that can be performed for your items.

Quality Features

Full-cycle integration with other modules

Quality enables you to identify defective items in other LAMP modules from purchase orders deliveries, receipts to the warehouse, up to production batches.

Industry-standard quality controls

Based on best practices of performing quality checks, various sampling and test specification capabilities were incorporated into LAMP quality to provide the test platform to control and ensure the item's quality.

Repository of quality management data

Collect quality control data for analysis in inquiries providing the facility to take corrective action to provide continuous quality items.

Flexible Sampling Procedures

Quality Assurance provides multiple sampling sources which you can get it from the supplier before receiving the item, from inventory for raw material and finished good testing and from production for processed product testing.

Systematic sampling against specifications

Through the use of various specifications, sampling automatically retrieves the tests to be performed for a specific item and the acceptable results for the tests are automatically compared with actual test results to generate the final disposition for the item.

Report Availability

Through the use of quality reports, management can quickly determine the status, rate of failure of all items tested.

Benefits of Using Quality

- Provides facility to enter quality specifications for the item
- Facilitate sampling of items for testing
- Provides facility to monitor quality status of items in inventory
- Ensures quality from purchase order receipt up to production batches

Benefits of Working with Impart Solutions

We build lasting relationships with our clients by helping them create new business models and innovative solutions thereby enabling organizations to leverage technology for a stronger return on investment and provide enhanced services to their customers, vendors and employees.
