

REPORT WRITING SERVICE

Impart Solutions, Inc. recognizes the importance of reports for each organization. Reports link the management and operations people by providing accurate and organized information allowing them to plan, analyze and resolve problems before they occur.

With Impart Solutions report writing methodology, clients are provided with quality reports that meet the unique requirements of each of the client's functional area. We provide valuable and accurate information to be made available for your organization.

Through the years, Impart Solutions has developed a repository of reports from different industries to cater your reporting needs. The list of reports are generalized with templates and corresponding documentation on its design and specifications to facilitate the implementation of your reporting requirements.

Impart Solutions' veteran report writers include skilled software engineers and systems analysts well-versed in identifying key requirements for your reports. Analytical skills provide the advantage of knowing where in your applications the report fields can be obtained and a solid understanding of relational database design.

Impart Solutions has used report writing tools from different ERP systems such as SAP, Oracle E-Business Suite, and JD Edwards. These tools include ABAP, Oracle report builder, and JDE's report design aid.

We also utilize various report writing software such as crystal reports, cognos, etc. to interface with your enterprise applications.

Impart Solutions provides the capability of creating reports and report subsystems directly from programming languages such as COBOL, C, C++, etc.

Total fund balances	11,629,381	13,054,280
	11,634,381	13,065,836

Methodology

Impart Solutions' report writing methodology has been proven from several engagements. We follow seven phases of report writing. Each phase covers an extensive approach to ensure the high quality of results.

From collecting data of existing reports, to the computation of the required fields to come up with the report layout. After which, parameters are identified to run the report and then locate the fields within the database for extracting the data before coding the report. Then comes the review before testing the report.

Benefits of Working with Impart Solutions

We build lasting relationships with our clients by helping them create new business models and innovative solutions thereby enabling organizations to leverage technology for a stronger return on investment and provide enhanced services to their customers, vendors and employees.
