

**SALES**

Sales reduces order fulfillment costs and cycle time through improving order accuracy and facilitating on-time delivery. LAMP enables real-time tracking of order status ensuring that deliveries arrive on time, all the time.

**Sales Features**

**Efficient Sales Ordering**

LAMP's Sales module provides an easy way of recording and releasing orders in inventory and controlling stock with its capability to reserve orders.

**Customer friendly RMAs**

RMA (Return Merchandise Authorization) provides a control mechanism that authorizes merchandise returns in an organized manner.

**Inventory Integration**

Sales linkage to Inventory allows smooth material transfer from the warehouse where the items are located to the shipping point where the items will be transferred for distribution.

**Advance Distribution Integration**

Sales linkage to advance distribution ensures the safety of the ordered items from the shipping point to the customer location.

**Automates Computation of Charges**

LAMP applies all the necessary charges based on predefined charge sets that may apply to different orders to further speed up the ordering cycle.

**Fast Order Tracking**

Monitoring becomes quick and easy with informative inquiries that lists the status of the orders in place.

**Industry Standard Reports**

Through the use of industry standard reports, management can quickly determine the status of the orders and can immediately plan for future orders.

**Benefits of Using Sales**

- Keeps track of customers' order
- Automated computation of currency, taxes and other charges
- Creation of multiple price list for sales order and sales agreements

**Benefits of Working with Impart Solutions**

We build lasting relationships with our clients by helping them create new business models and innovative solutions thereby enabling organizations to leverage technology for a stronger return on investment and provide enhanced services to their customers, vendors and employees.
