

WEB ORDERING SYSTEM

In today's busy world, every minute matters. As a result, Impart developed an online ordering system where customers can shop without the hassle of moving to other location.

Web Ordering empowers your customers by providing web access to browse through your products, allowing insight on available stock. It serves as a portal to allow your customer to directly enter and place their orders.

Through the web ordering capability of LAMP, shopping what you need is just a click away.

Web Ordering Features

Shopping made easy

Web Ordering module facilitates rapid order processing and invoicing of orders wherever you are. All you need is an internet connection and you can shop anytime.

Returns

The RMA feature facilitates the return of delivered goods that are not in good condition.

Hassle-free Payment

You do not have to queue to pay for your ordered goods. With the use of your credit card, you can pay by just clicking a button.

Integration with Sales, Advance Distribution and Accounts Receivable modules

The Web Ordering module is directly integrated to the Sales and Shipping modules to improve operational efficiency.

Integration with Popular Carriers

Web Ordering is integrated with popular carriers that provide real-time status of your shipment through tracking numbers.

Payment Security

Web Ordering module features secure payment facilities and it is integrated with payment gateways for credit card processing. It also allows multiple payment methods for your customers.

Benefits of Web Ordering

- Keeps track of order status
- Easy shopping
- Facilitates return of ordered goods to supplier.

Benefits of Working with Impart Solutions

We build lasting relationships with our clients by helping them create new business models and innovative solutions thereby enabling organizations to leverage technology for a stronger return on investment and provide enhanced services to their customers, vendors and employees.
